

Meetings at work

The meeting ended an hour ago. Nobody agrees on what was decided.

An hour after the call

Sam Did we say the 21st or the 28th?

Priya Who is sending the pricing deck?

You What did Acme ask for again?

Four problems every company has with meetings. Here is how Lynkk solves each one.

Problem 01 · Lost decisions

Decisions fade after the call. Lynkk writes them down.

Meeting Brief · Design review

Decided Beta ships on the 21st

Why Legal signs off on the 19th

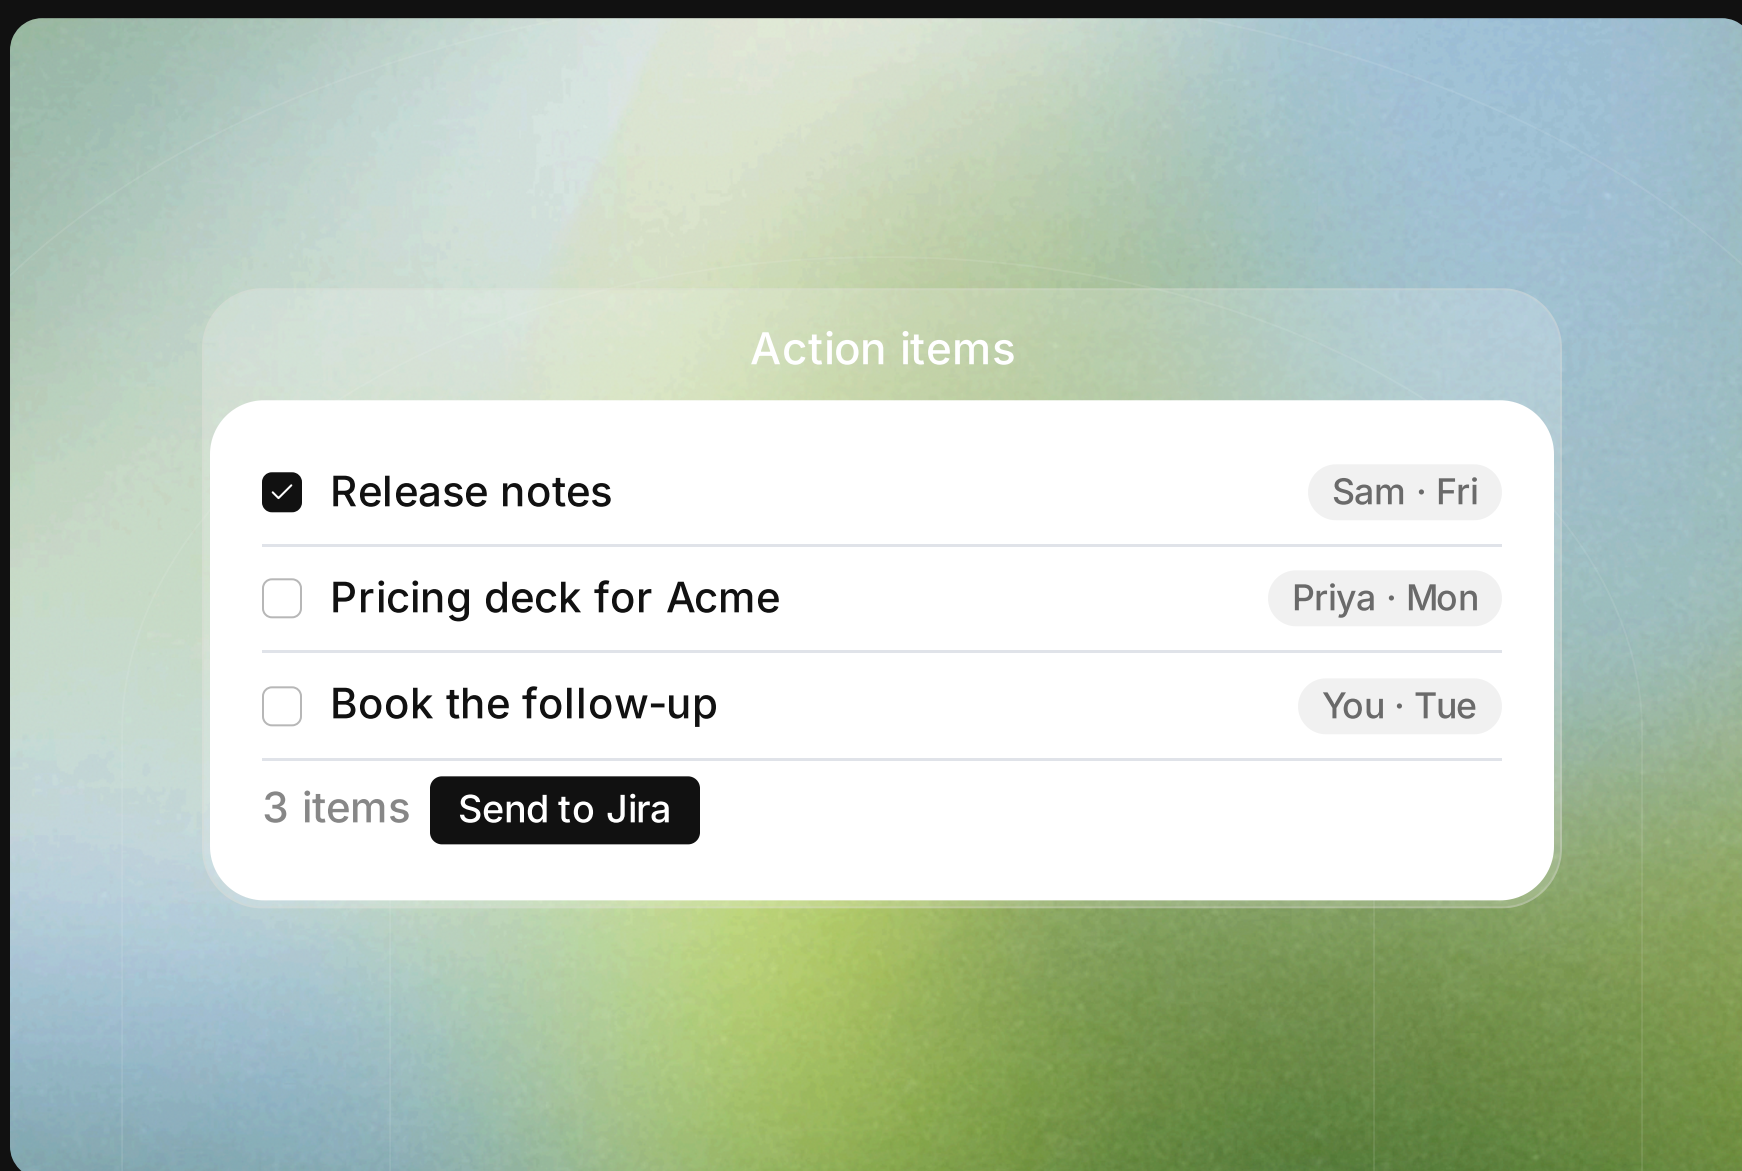

Open EU pricing

12:04 "Let's ship the beta on the 21st."

Decisions with context, open questions and key takeaways.
Every timestamp plays the recording from that moment.

Problem 02 · Tasks with no owner

Everyone heard the task. Nobody owned it.

Every action item gets an owner, a due date and a priority. Send them to Jira from the note, one issue each.

Problem 03 · Walking in cold

You forgot the last call. Lynkk sends the brief first.

Your morning briefing

10:00 Acme renewal

Meeting Dana, Leo from Acme

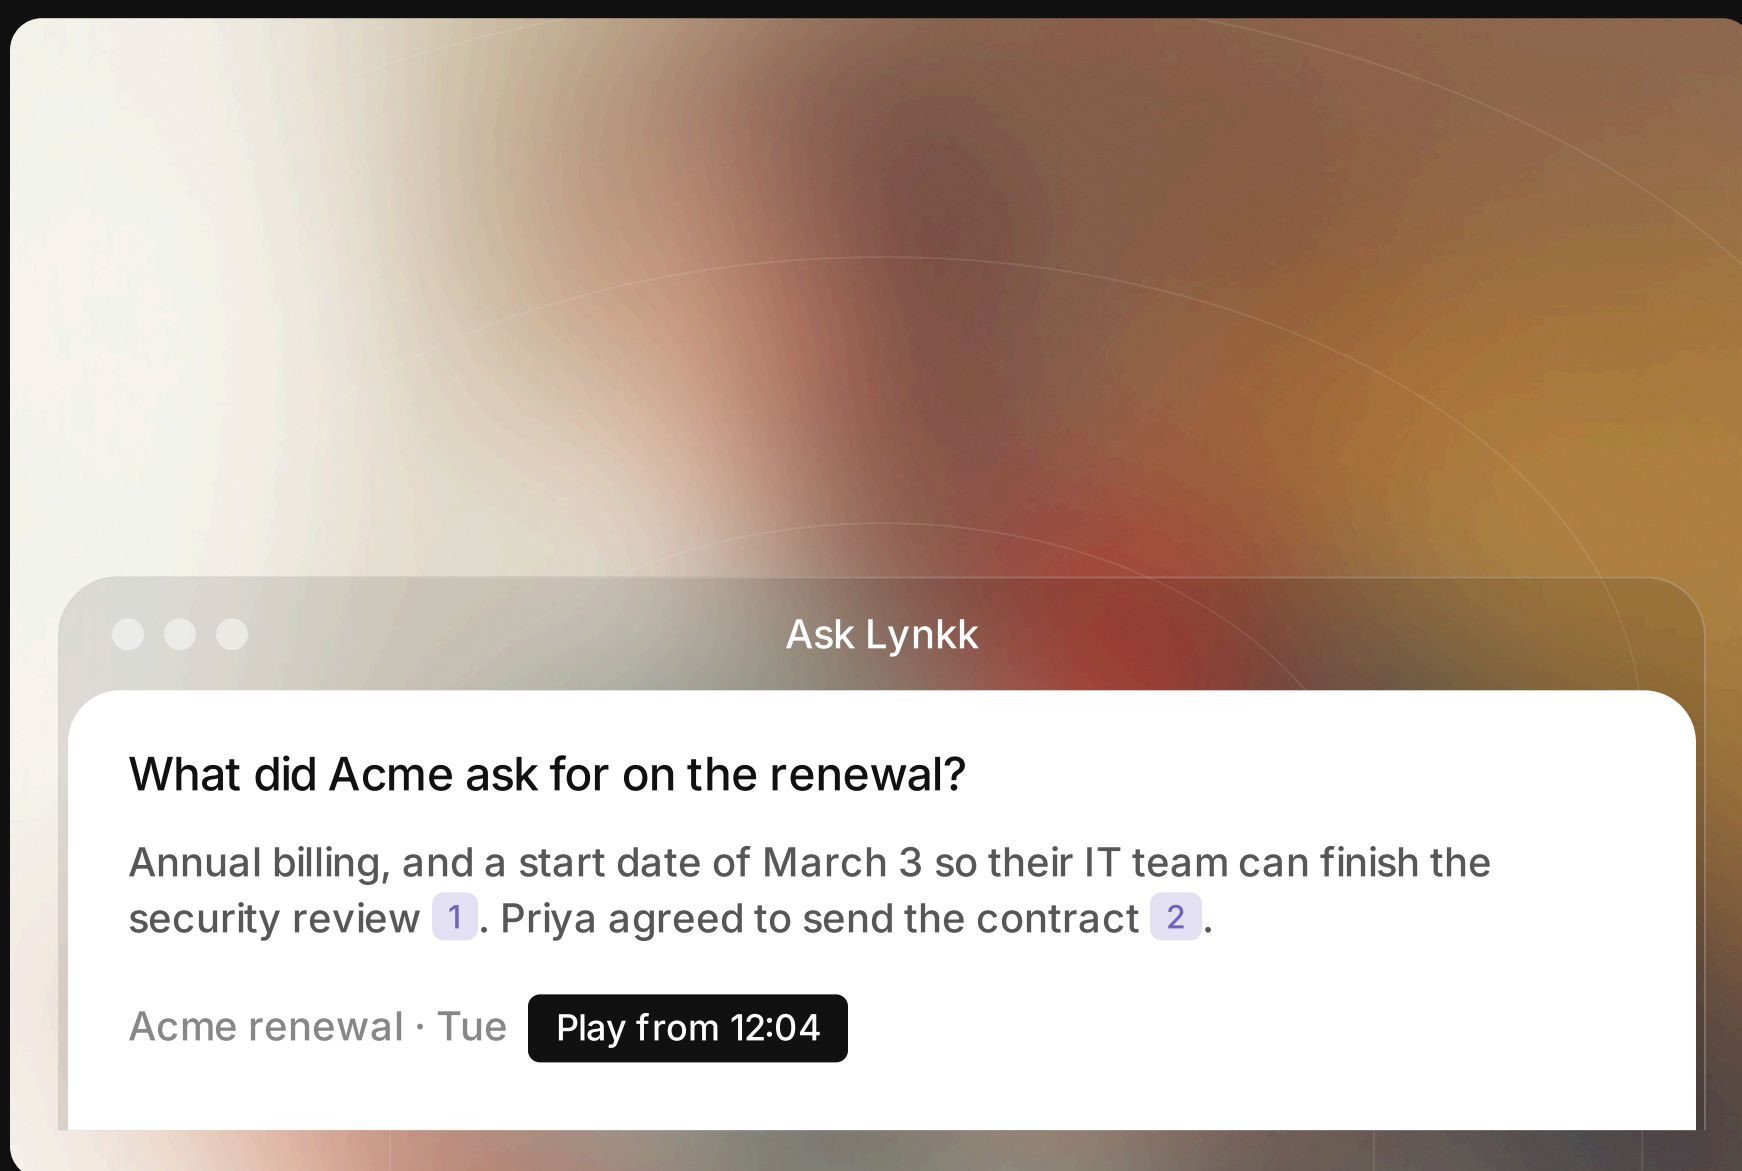

Last note Acme pricing call, Tue

Still open 2 action items between you

Connect Google Calendar. On days you have meetings, the email shows who you're meeting and what's still open.

Problem 04 · Ask Lynkk · Pro

The answer is in a call from March. Ask Lynkk finds it.

Answers come only from your own notes. Each one cites the note and opens it at the moment it was said.

The short version

Four problems. One set of notes that fixes them.

Without notes		 Lynkk
Decisions	Remembered three different ways.	Written in the Meeting Brief, with the moment it was said.
Tasks	Heard by everyone, owned by no one.	An owner and a due date, sent to Jira from the note.
Prep	You walk in cold.	A morning email with your last note and what's open.
Answers	Lost in an old call.	Ask Lynkk, with a citation to the note (Pro).

[Start free](#)

Stop taking notes. Start finishing meetings.

Lynkk records the call, writes the brief, and hands your tasks to Jira.
